Q3

Q4

- HighTech industry investment plan (crude version and Plan are subject to change)
 - We are considering investing in Eco-friendly energy development, The reason is that many energy coins only have plans and can't create real assets (energy).
 - Therefore, We plan to draw up a plan by focusing on the production of Eco-friendly energy that is produced faster than conventional energy and is beneficial to investors.
 - For this reason, the initial token price may be high, but it may cost a lot of investment in the industry, So please understand and compensate for this.
 - We will definitely reward you with a token swap and if it becomes the future of electricity trading, We will compensate for this well (Now there are legal issues).

XGAE's

- We have been designated as the SapSalGae Token holder's as XGAE's.
- XGAE's mean is dog(GAE = dog) eating s**t, and mix dog, but It's said to be **healthy** because only **strong genes** remain because it was grown in an environment that was naturally selected without any other breeding improvement and s***t gives dog **a lot of nutrients** in South Korea.
- To sum up, Holder's who want increase real financial assets and Digital assets (**A lot of nutrients**) through long-term (**Healthy, strong genes**) investment are called **XGAE's**.
